

Luka Ivanović

Brand | Graphic | Web Designer

I'm a multidisciplinary designer combining creative thinking with a structured and practical approach. My experience spans across **brand identity**, **graphic** and **web design**, with a focus on creating clear visual systems that work consistently across different formats and touchpoints.

I work primarily with **Adobe Creative Suite** and **Figma**, with additional experience in motion design using **After Effects** and front-end development with **HTML**, **CSS** and **JavaScript**. I also actively integrate AI tools such as **ChatGPT**, **Claude**, **Magnific** and **Adobe Firefly** into my workflow for research, ideation, visual exploration and production.

I'm comfortable working independently or as part of a team, taking projects from early concepts and strategic thinking through to detailed design and final execution.
